

CenturyLink® Managed Hosting

Manage Your Business

Remove the Chaos of Day-to-Day IT Management

With CenturyLink Managed Hosting, you can eliminate the stress of mundane IT management and make your team a true innovator. Easily leverage our dedicated server, cloud, colocation, and access to third party cloud providers; we can help you build the business case for delivering more efficient IT. With a broad choice of IT capabilities, from managed to DIY, you can protect your business more effectively through CenturyLink security services, and access 60+ data centers that deliver over 160 managed IT services.

And with our flexible service model facilitating our ability to provide a vast range of solutions, from Colocation to Cloud, it's easy to understand why nearly half of Fortune 100 businesses are CenturyLink Managed Hosting customers.

CENTURYLINK MANAGED HOSTING: THE SMARTER CHOICE

At CenturyLink, we've spent more than a decade delivering fully managed hosting environments to enterprises with some of the most demanding, complex requirements in the industry. Today, our customers rely on that expertise to deliver intelligent solutions that drastically improve the efficiency of their IT organizations.

CenturyLink Managed Hosting is engineered specifically for businesses that need to respond quickly and efficiently to the demands placed on their IT infrastructure. A robust, high performance hosting environment is paramount to running a business and ensuring that your applications are delivered to your customers and end users without compromise.
