

# CenturyLink IQ<sup>®</sup>+ Private Port

## Network Virtualization Delivering Optimal Data Center Connectivity at a Reduced Total Cost

With today's businesses requiring high performance connectivity to cloud services, colocation environments, and data center-based managed services, companies like yours are turning to CenturyLink to provide integrated solutions making it faster and easier to be connected to their business applications. As a recognized global leader in both data networking and hosting services, CenturyLink understands the challenges of these complex environments and works with you to provide you with a network solution that fits your needs.

CenturyLink IQ+ Private Port supports seamless private network connectivity into CenturyLink's comprehensive suite of managed services, cloud applications, and colocation space.

### CenturyLink IQ<sup>®</sup> Private Port with Data Center Access

A fully integrated solution that delivers scalable and resilient connectivity to all CenturyLink Data Center environments.

- No need for loops
- No need to purchase additional cross connects
- No need to purchase router or the additional space and power
- Built-in resiliency to keep your applications available to your MPLS private network
- Bandwidth on-demand solution
